

# Cock Fights

Feathers, money and battles — welcome to Cock Fights!

# Cock Fights

## Main characteristics

Platform with a transparent structure  
and capabilities

Decentralized finance  
and fully autonomous ecosystem operation

Ecosystem's own currency – NFT Cock Fights tokens

Objects: NFT cocks, NFT eggs, NFT farms, NFT ammunition,  
NFT equipment

Enjoying the gameplay – high-quality graphics, audio effects, unique arenas

# Cock Fights Game

The game platform combines NFT and DeFi

	Main	Addition	Addition
<b>Structural elements</b>	Cockfights in the arena	Marketplace	Sweepstakes
<b>Assets</b>	Cock Fights Token (CFT)	NFT-cocks, NFT-eggs, NFT-avatars	NFT-ammunition, NFT-incubators, NFT-farms
<b>Opportunities</b>	Exchange for other currencies through Pancake Swap	Automatic calculation of dividends in CFT	Automatic recalculation of prices depending on the CFT rate
<b>Participation in decision making</b>	Telegram chat	Voting on the DAO	Round-the-clock support service

# Application layer & Blockchain

The application layer and most of NFT-assets are deployed on The Open Network (TON) and ETH network

Cock Fights tokens (CFT) will bridge to public chains compatible with TON

# Smart-contracts

Each NFT-asset of the company has its own smart-contract.  
You can get acquainted with the individual characteristics of each one when purchasing NFT assets on the [cock-fights.com](https://cock-fights.com) website or partner websites: [Binance](https://binance.com), [DaoMaker](https://daomaker.com), etc.

**Cock-fights NFT tokens** – smart-contracts don't provide for automatic burning during transactions. It provides to split the token into 10 parts

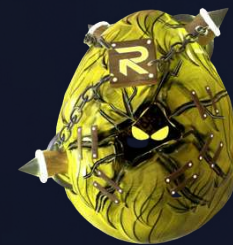

**NFT-avatars** – smart-contracts provide for auto-dividends if NFT avatars are staked on platform [cock-fights.com](https://cock-fights.com)

**NFT-farms** – smart-contracts provide for a limited period of validity – 1 or 2 years. The performance of each farm whose products are NFT eggs corresponding to the category of the farm is foreseen

**NFT-ammunition** – smart-contracts provide for the possibility of interacting with NFT-cocks to improve their characteristics. NFT-ammunition can be removed from NFT-cocks and further disposed of as with any NFT-asset: sell, present, exchange

**NFT-eggs** – smart-contracts provide for the possibility of transformation into NFT-cocks of the corresponding category

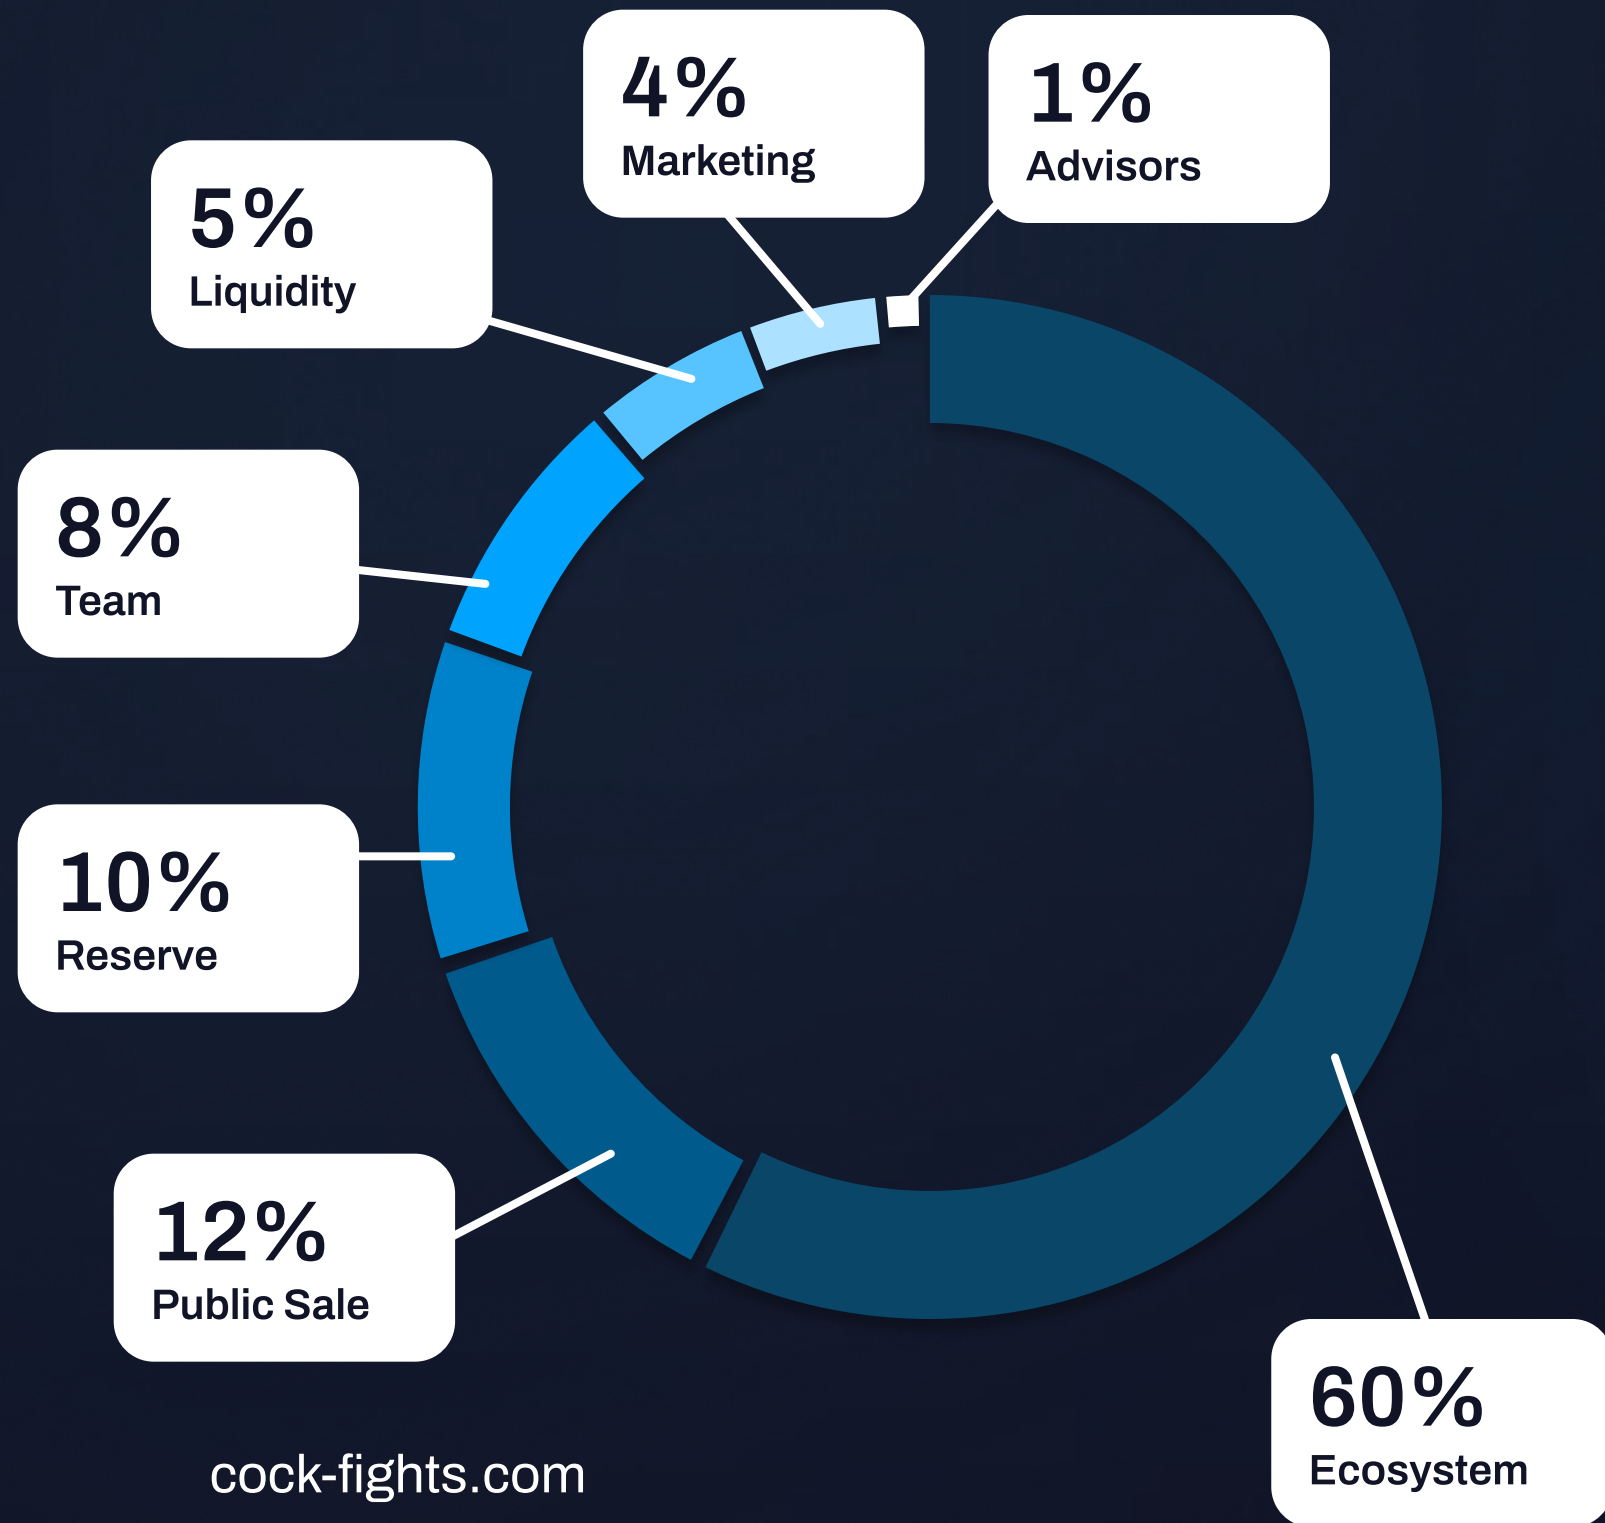

**NFT-incubator** – smart-contracts provide for a validity period of 6 months. Suitable for all categories of NFT farms

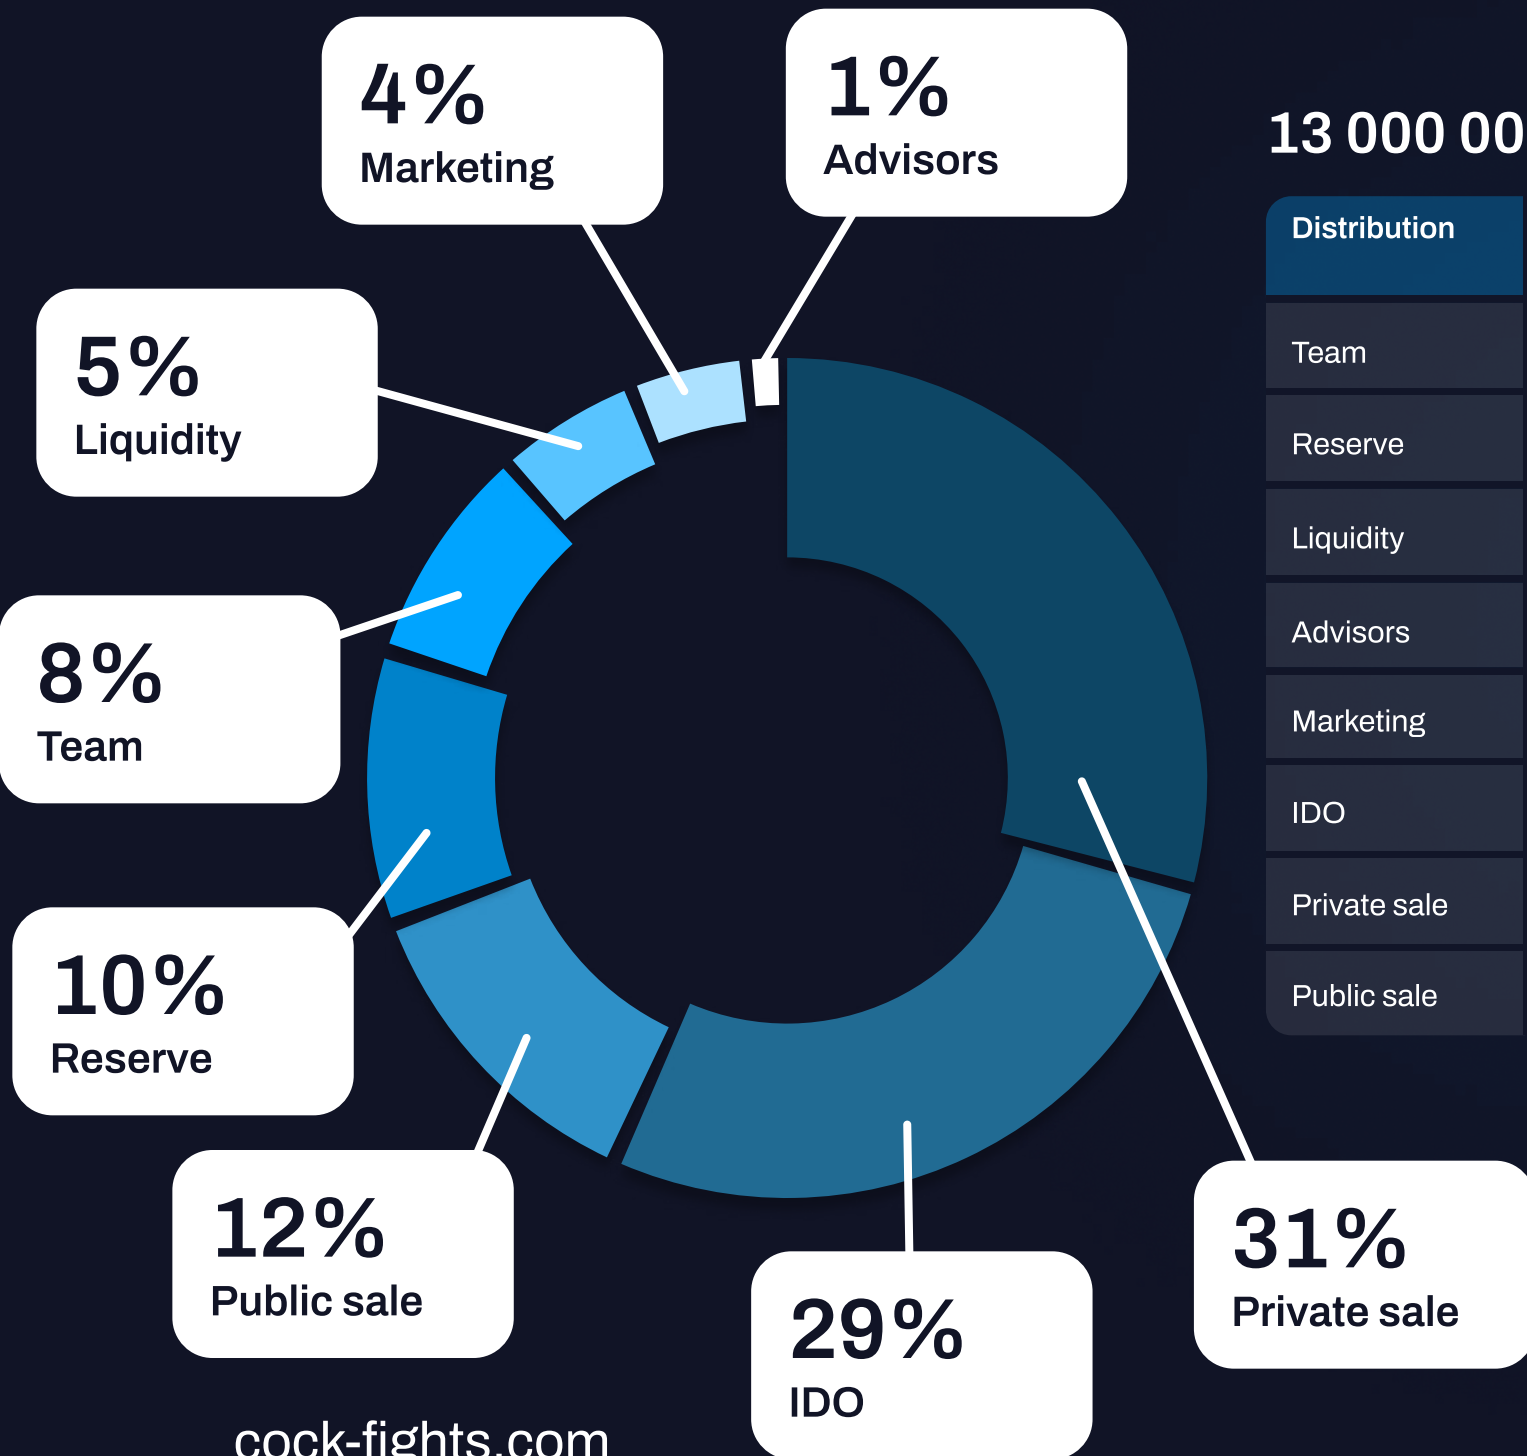

**NFT-cocks** – smart-contracts provide for the possibility of interacting with any type of NFT-ammunition, but no more than 1 type of each parameter. NFT-ammunition can be removed and put on

# Token economics

Ecosystem	60%	To maintain platform's functioning
Public Sale	12%	In free circulation on DEX Swap
Reserve	10%	Reserve for Ecosystem
Team	8%	Team's resources
Liquidity	5%	To maintain liquidity
Marketing	4%	For marketing development
Advisors	1%	Tokens for partners and consultants

# Token Distribution

13 000 000 will be released till end of May

Distribution	% supply	Tokens	Price	Raising \$ (USD)	TGE supply	TGE supply (%)	Vesting
Team	8%	1 040 000			0	0,00%	4 month lock, vesting 10 every month from TGE+4 to TGE+14
Reserve	10%	1 300 000			0	0,00%	minimum 8 month lock
Liquidity	5%	650 000			65 000	0,50%	TGE 10%, every month 10% (to TGE+9)
Advisors	1%	130 000			0	0,00%	4 month lock, vesting 10% every month from TGE+4 to TGE+14
Marketing	4%	520 000			52 000	0,40%	TGE 10%, every month 10% (to TGE+9)
IDO	29%	3 770 000	0,12	452 400 \$	1 517 802	11,68%	TGE 40,26%, TGE+1 39,47%, TGE+2 20,27%
Private sale	31%	4 030 000	0,07	282 100 \$	2 307 175	17,75%	TGE 57,25%, TGE+1 37,50%, TGE+2 5,25%
Public sale	12%	1 560 000	0,15		1 560 000	12,00%	TGE 100%

# Initial public sale plans

In total, 13,000,000 CFT will be issued, there will be no additional issue. The number of CFTs will decrease quarterly

Stage	Number	%from Total	Timing	Price
IDO	3 770 000	29%	Oct- Nov 22	0,12
Listing on DEX platform Swap	1 560 000	12%	December 22	0,15

In the future, buying and selling CFT will be available on DEX Swap

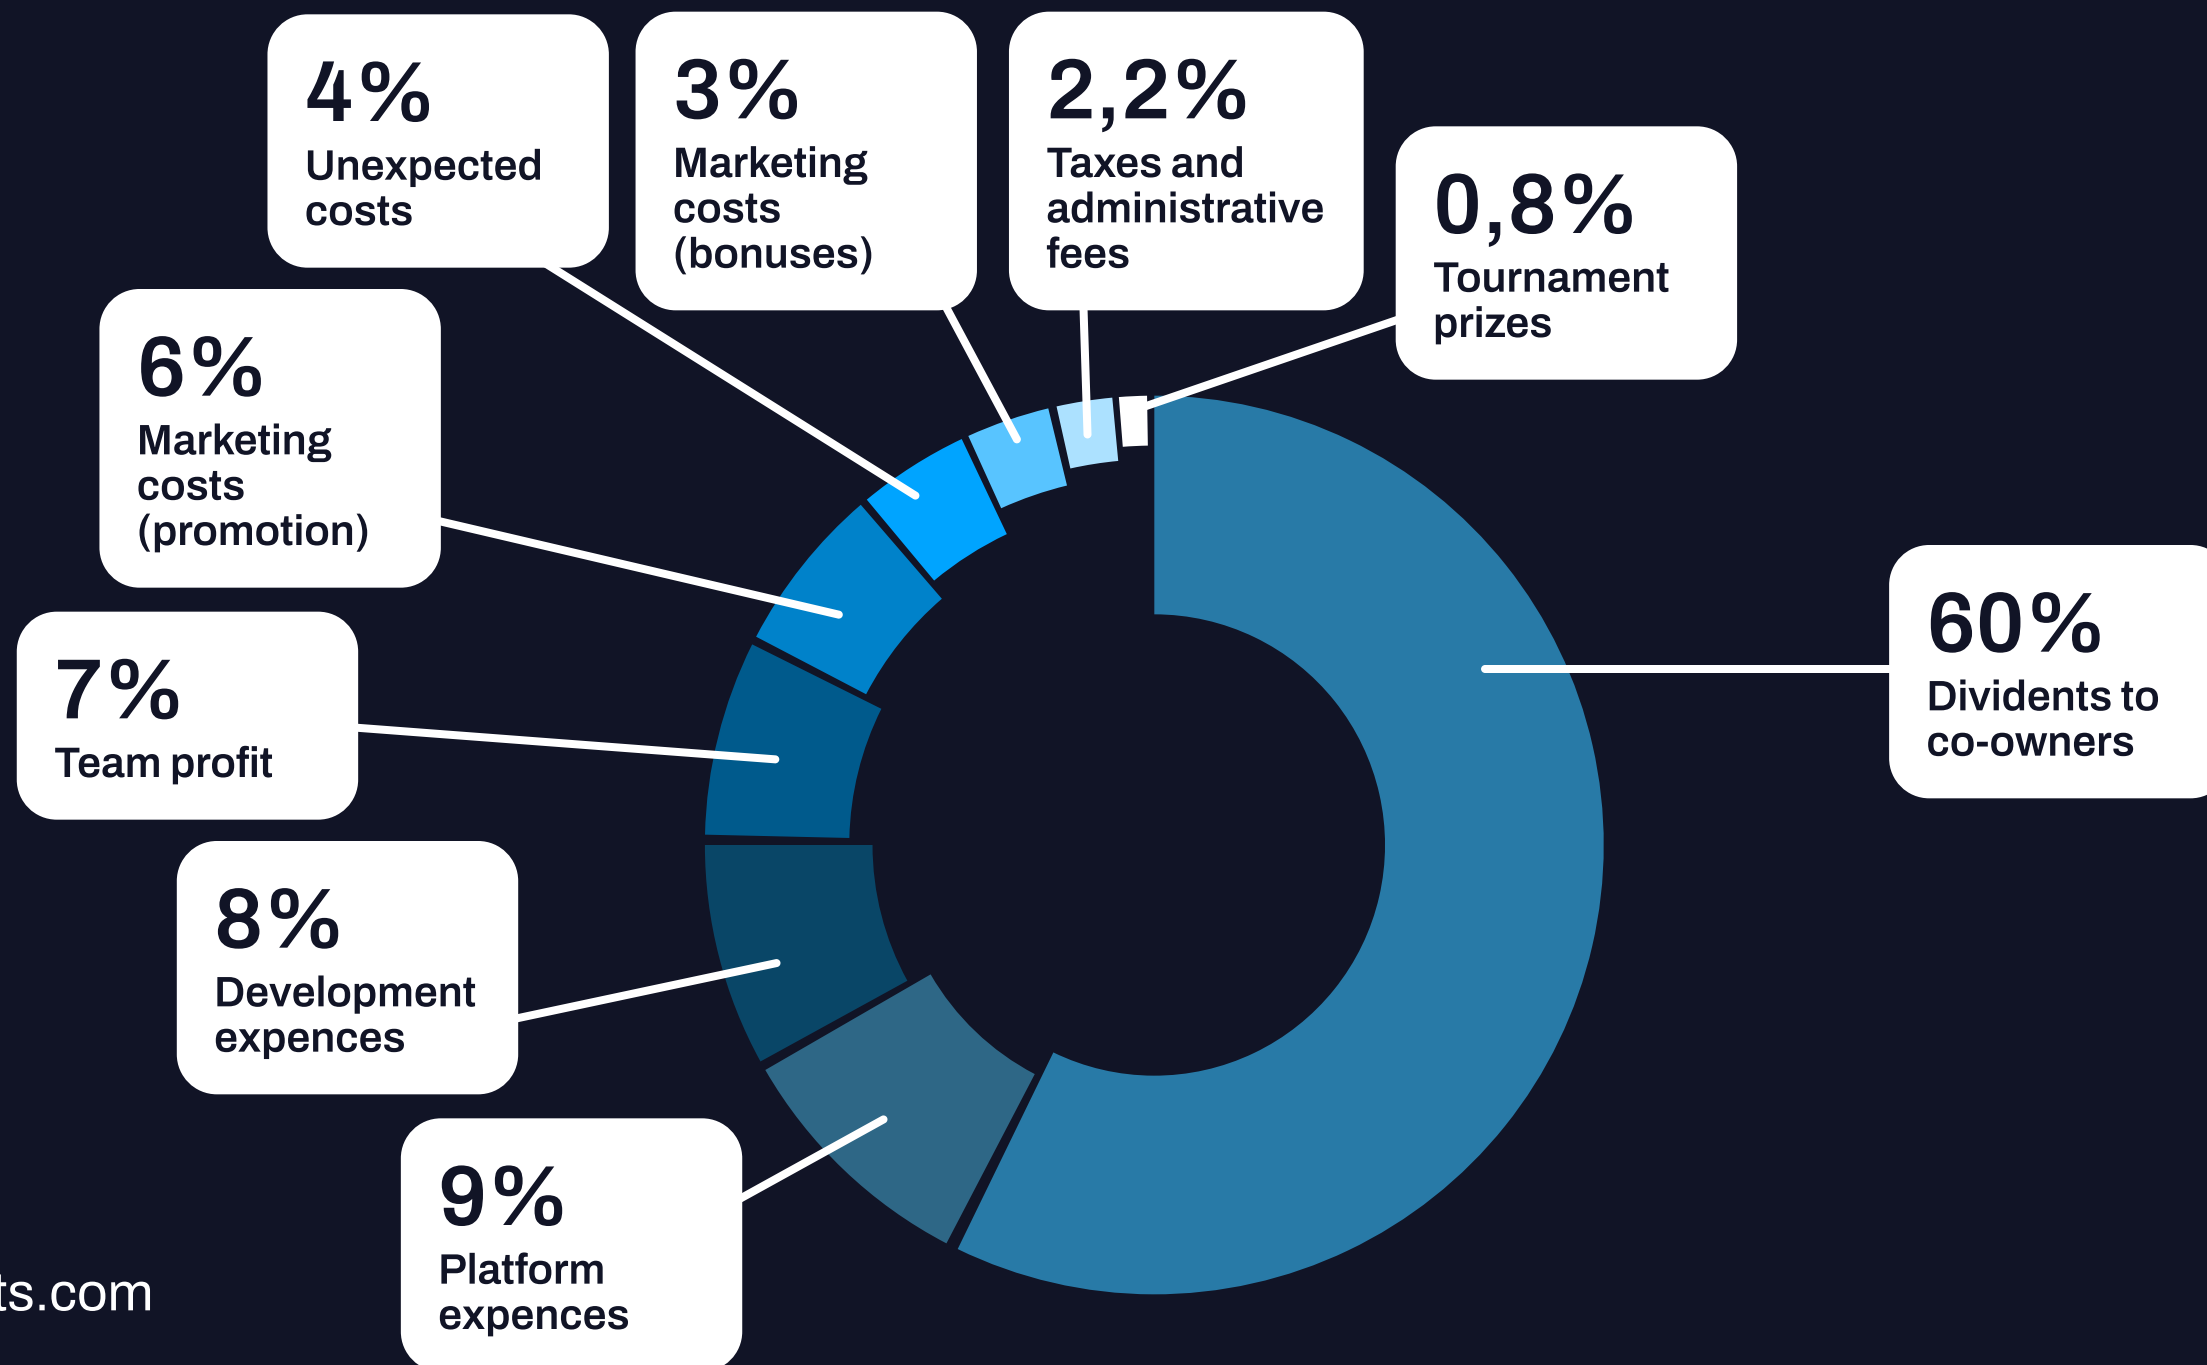

# Distribution of income from the initial tokens sale

# Nearest plans

Month	Sphere	Action
Sep 2022	Marketing	Creation of a promo video for the project in 3D. Voice acting, editing, rendering, soundtrack
Sep 2022	Technical	Large-scale update of the project site. Connecting the work of smart-contracts, setting up decentralized payment systems, implementing functionality for modeling the gameplay
4 Q 2022	Marketing	Carrying out marketing research
4 Q 2022	Marketing	Carrying out marketing campaigns: Facebook; Twitter; Telegram, etc
Oct 2022	Marketing	Holding weekly contests
Oct 2022	HR	Additional hiring of developers, marketers, interpreters, community administrators, project manager, artists, animators, analysts, financial manager, testers
Oct 2022	PR	Conducting AMA conferences through various promotional channels
Nov 2022	Marketing	Holding weekly contests
Dec 2022	Technical	Gameplay testing
Dec 2022	Marketing	Holding weekly contests

# Planned income distribution for 2 years of project implementation

# Prospect dynamics

cock-fights.com

## To maintain current trend of players Cock Fights intends:

- To provide regular marketing actions according to Marketing Costs;
- To do an outstanding graphic and usability of Cock Fights game;
- To provide all play-to-earn opportunities;
- To provide all betting options.

# Prospect dynamics

Rate of CFT (USD/CFT)

cock-fights.com

**To support the dynamics of the exchange rate, Cock Fights plans to:**

1. Maintain the trend of the players number;
2. Enable CFT burning (avatar staking and DAO voting);
3. Offer spare CFT staking;
4. Engage CFT reserve and liquidity.

# Road Map

3 Q 2022

4 Q 2022

1 Q 2023

2 Q 2023

3 Q 2023

Website update, smart-contract creation, preparation and configuration of the platform, release of Cock Fights NFT tokens, creation of the first NFT fighting cocks.	Launch of the Alpha-version of the Cock Fights game, CF Marketplace launch, CF sweepstake creation, development of CF NFT-farms, development of the technical possibility of voting in DAO.	Adding functionality to the site: the opportunity of staking NFT-assets, holding tournaments, Beta-version of the game.	Game bugfixes, preparing for creation of the final version.	Integration of new functionality into the game.
Project tokenomics.	Creating an automatic CF sweepstakes mode.	Development of the prize pools and tournament schedules.	Development of new marketing actions.	
White paper, IDO, listing	IGO on - sale of NFT-eggs, start of NFT-ammunition sale on marketplace.	Sale of NFT-farms on marketplace, voting in DAO.	Involvement of new partners.	
Private sale of CFT for avatar owners.	Sale of the first fighting cocks on project website for avatar owners.	Staking NFT-avatars with permanent profit for their owners.	Information gathering from users to improve quality.	

# Opportunities:

## The platform provides users with various options:

- Fight in the ring with NFT fighting cocks. Players can enjoy beautiful realistic graphics, audio effects, animation, the ability to design arenas on their own. The battle winner receives a cash reward. To increase the parameters of your NFT rooster, you can purchase ammunition of various qualities. Improving parameters increases the chances of winning;
- Engage in farming, growing eggs, which can then either be sold on the Marketplace or turned into fighting cocks;
- Engage in trading on the marketplace – purchase a product that you think will increase in price and then sell it;
- Place bets on fighting cocks that you think will win, resulting in wagering winnings;
- Invest spare CFT and receive interest in the form of NFT-assets;
- Free exchange of CFT for any currency on the DEX Swap exchange.

# Cock Fights Game

## Play-to-earn

### Active user income

1. Victory in arena battles
2. Winning in sweepstakes
3. Trading on the Marketplace

### Passive user income

1. Staking CFT and receiving NFT-assets
2. Farming

# Cock Fights Game

## Play-to-earn

# NFT-assets and value

## NFT-avatars

Limited edition (2000 pcs) without additional issue. Each avatar will bring dividends to the owner. Additionally, avatars make it possible to manage the project by participating in DAO voting. A significant increase in the price of an NFT-avatar is expected. It will be possible to purchase an avatar only if the owner wishes to put it up for sale on the marketplace and on partner resources

## NFT-cocks

Limited edition (5000 pcs) without additional issue. In the future, cocks can be obtained from eggs or through secondary sales on the marketplace. The price of an NFT-cock in dollar terms will not be very dynamic. Some fluctuations are expected in the secondary market due to the different points of cocks parameters

## NFT-eggs

Permanent issue. The volume of emission will depend on the growth in the users number. In addition, eggs can be obtained by staking CFT and also by farming. The price of an egg in dollar terms is not expected to change

## NFT-ammunition

Permanent issue. The volume of emission will depend on the growth in the users number. The price of ammunition in dollar terms is not expected to change. Deviations are possible in the secondary market

## NFT-farms

Limited edition of 100 pieces annually. The price on the secondary market is expected to be slightly higher. The price in dollar terms remains unchanged

# NFT-avatars

An avatar is an NFT-asset that makes its owner a co-owner of the Cock Fight project and also provides initial user benefits. A total of 5,000 avatars have been released with no additional release planned. In order to take advantage of the owner's benefits, it is necessary to stake the avatar - fixing it on the Cock Fights platform.

## Initial user benefits

Opportunity to buy CFT on a private round of sales at a price lower than on IDO

Possibility to buy NFT-cocks with open parameters during the initial cocks sale

## Owner benefits

Opportunity to participate in the distribution of company income

The ability to make proposals for the strategic development of the project voting on the DAO

# The owner of an NFT-avatar must comply with the following condition in order to participate in the distribution of Cock Fights income:

Condition — the NFT-avatar must be staked on the Cock Fights website. Starting from the next day after staking, the accrual of received dividends for the owner of the NFT-avatar is calculated daily according to the formula:

$$ICO = \frac{CP}{NA}$$

**CP**  
is part of the commission pool intended for payments to owners of all NFT-avatars in CFT

**NA**  
is a number of NFT-avatars that match the condition

# NFT- cocks

Unique fighting cocks, each made using NFT technology. The use of technology ensures the absolute uniqueness of each cock in its appearance and characteristics. They can be used in arena battles as well as sold on the platform marketplace and on third-party resources. It is assumed that the number of available cocks will be no more than 20% more than the number of active users of the game.

**N – an ordinary fighting cock**  
with 140 points of total parameters; 60% cocks

**SR – a very rare fighting cock**  
with 218 points of total parameters; 9% of cocks

**R – a rare fighting cock with**  
178 points of total parameters; 30% cocks

**SSR – the rarest fighting cock**  
with 260 points of total parameters; 1% of cocks

## Where to buy a cock?

**Initial release –  
5,000 pieces**

Only owners of NFT-  
avatars will be able to see  
the characteristics of  
cocks

The ability to see the  
distribution of points by  
parameters – YES

**Buying on the site's  
marketplace**

A site user can buy a  
cock on the marketplace  
if the cock owner puts it  
up for sale

The ability to see the  
distribution of points by  
parameters – YES

**Purchasing from  
third-parties**

Buying a cock on a  
partner resource  
(Binance) if the cock  
owner puts it up for sale

The ability to see the  
distribution of points by  
parameters – YES

**Egg opening**

Opening the egg on the  
platform gives the player  
a cock.  
[See next page](#)

The ability to see the  
distribution of points by  
parameters – NO

# NFT- eggs

Unique eggs made using NFT-technology. From each egg, when they are opened, a fighting NFT-cock appears. Each egg is unique, and accordingly the cock hatches from the egg also with unique characteristics. But depending on the classification of the egg, the buyer receives a cock of the corresponding classification with a total characteristic of indicators corresponding to the characteristics of a cock of this category. The owner of the egg does not know the detailed distribution of characteristics but they correspond to the following principles: no more than 50% of the total indicators and no less than 20% is occupied by one parameter. New releases expected quarterly.

**N – an egg**  
from which an ordinary cock appears

**SR – an egg**  
from which a very rare cock appears

**R – an egg**  
from which a rare cock appears

**SSR – an egg**  
from which the rarest cock appears

## Where to buy an egg?

Where to buy?

On site's marketplace

How much ammo?

Depending on the total number of NFT-cocks and eggs: one complete set per unit

# Parameters of NFT-ammunition

Strength

Speed

Endurance

Health

## Improving parameters depending on the level and characteristics of cocks

**N**

- +5 Doping injection volume 0.3; normal plumage; energy drink volume 0.3; conventional body armor
- +10 Doping injection volume 0.5; streamlined plumage; energy drink volume 0.5; reinforced body armor
- +15 Doping injection volume 1.0; ultralight plumage; energy drink volume 1.0; heavy-duty body armor

**R**

- +7 Ordinary inserts on the wings; aluminium nozzles; small pacemaker; regular safety helmet
- +14 Reinforced inserts on the wings; lithium nozzles; average pacemaker; reinforced safety helmet
- +21 Heavy inserts on the wings; titanium nozzles; large pacemaker; heavy duty safety helmet

**SR**

- +10 Iron claws; small propeller; small catheter; glass protection for legs
- +20 Chrome claws; middle propeller; middle catheter; glass protection for body
- +30 Iridium claws; large propeller; large catheter; glass protection for the body, legs, head

**SSR**

- +20 Metal beak; Knapsack with 1 nozzle; spare vessels; protective neon regular
- +40 Spiked beak; Knapsack with 2 nozzles; spare lungs; protective neon reinforced
- +60 Beak with blades; Knapsack with 4 nozzles; spare heart; protective neon heavy duty

# NFT-farms and incubators

NFT-farms are currently under development. According to the development plans, their release is scheduled for the 3rd quarter of 2022. With the help of farms, players will independently produce eggs, which later can be both sold and opened and received cocks. NFT-farms will produce category eggs corresponding to farm categories.

**Farms will be released in limited quantities, planned release in the table**

Farm category	Farm number
N	50
R	30
SR	15
SSR	5

For farming the initial release assumes incubators in the kit, but the incubators have an expiration date and will need to be updated in the future. Additional release of incubators planned for Q1 2023.

# Marketplace

On the marketplace each user of the ecosystem will be able to buy and sell any Cosk Fights NFT-asset. Both primary sales (release of new NFT-assets by the project team) and secondary sales (sale by users of their existing NFT-assets) are provided.

## Advantages of buying and selling on the Marketplace compared to other resources

Higher demand for the seller: you are selling to system users who have a pronounced need

More information for the buyer: you see the seller; you see the product; the seller is also a system user; you can ask questions

# Fights

Site users will be able to actively earn money by participating in battles by using purchased NFT-cocks. Depending on the cumulative points of cock's parameters and the equipment worn, each user falls into one of 6 categories. The owner of NFT-cock can enter the fight: a) with cocks of his category; b) with cocks of a higher category; c) with cocks of a lower category (with confirmation of the consent of this category player). The entrance fee for each category of fights is different, the winner takes the competition pool minus the commission.

Points	Potential participants (description)	Share of players
Over 400	Cocks category SSR with ammunition SSR silver, gold; cocks category SR with ammunition SSR gold; cocks category R with ammunition SSR gold	0,80%
321-400	Cocks category SSR with ammunition SSR bronze; cocks category SSR with ammunition R – gold; cocks category SSR with SR ammunition – silver and gold; cocks category SR with ammunition SR gold; cocks category SR with ammunition SSR silver; cocks category R with ammunition SSR silver; cocks category N with ammunition SSR gold	2,40%
251-320	Cocks category SSR without ammunition; cocks category SSR with ammunition N of all categories; cocks category SSR with ammunition R – bronze and silver; cocks category SSR with ammunition SR – bronze; cocks category SR with ammunition N silver and gold; cocks category SR with ammunition R silver and gold; cocks category SR with ammunition SR bronze and silver; cocks category SR with SSR ammunition bronze; cocks category R with R ammunition gold; cocks category R with SR ammunition gold and silver; cocks category R with SSR ammunition bronze; cocks category N with ammunition SSR silver	13,20%
201-250	Cocks category SR without ammunition and with category N and R bronze,; cocks category R with ammunition N silver and gold; cocks category R with ammunition R bronze and silver; cocks category R with ammunition SR bronze; cocks category N with ammunition R gold; cocks category N with ammunition SR silver; cocks category N with ammunition SSR bronze	22,10%
171-200	Cocks category R without ammunition and with ammunition N bronze; cocks category N with ammunition N silver and gold; cocks category N with ammunition R bronze and silver; cocks category N with ammunition SR bronze	35,20%
140-170	Cocks category N with a bronze set of ammunition; cocks category N without ammunition	26,30%

# Sweepstake

The possibility of obtaining a high active income of the user.  
There are two betting modes, in most fights there is a choice.

## Auto mode

The project team sets the odds for the participants' wins and the players are paid depending on the result, regardless of the presence of a betting opponent

## Exchange mode

Players independently offer a bet and expect to receive a bet from an opponent. In this case, the payment occurs in the presence of two factors: - the opponent accepted the bet; the result of the battle is in favor of the player. When paying in this mode, a commission of 10% is withheld.

# Rating pool

1% of the commission pool will be allocated to the rating pool. In total, approximately \$1 million CFT equivalent will be spent on the rating pool. Tournaments will be launched from the beginning of the 4th quarter 2022.

# Staking

## Staking is essential for:

1. Reducing the number of spare CFTs and reducing inflation;
2. Avoiding artificial shortage of CFT in the ecosystem;
3. Avoiding speculative jumps in the CFT rate.

**NFT-avatar staking** – the owner of an NFT-avatar invests CFT in avatar staking one time. As a result:

- The owner of an NFT-avatar is eligible to receive Cock Fights income;
- While staking, an NFT-avatar cannot be sold on the marketplace and third-party resources. An NFT-avatar can be unstaked at the request of the owner but re-staking with a CFT investment is possible;
- CFTs earned through staking are distributed as follows: 55% to the reward pool; 30% burn; 15% to the project pool.

**Deposit staking CFT** – the user can invest spare CFT at a rate equivalent to the value of the deposit in USD for a certain period, receiving at the end of the term the invested CFT as well as a reward in the form of an NFT-egg.

NFT-egg category	Receipt period of NFT-egg	Deposit cost, USD
N	3 months	654,55
R	3 months	1309,09

# DAO

**The owner of the NFT-avatar has the right to participate in the management and development of the project by forming a question and participating in the DAO-voting.**

The owner of one avatar is entitled to one vote. The cost of a vote is determined in CFT at the current exchange rate at the time of voting (equivalent to 5 USD). The solution with the most votes wins, provided that at least 50% of the avatars participate.

The Cock Fights team burns the received CFTs at the time of voting.

Before publishing a question, you will need to familiarize yourself with the rules for conducting DAO voting, posted on the Cock Fights website.

# Team

**Amir G.**  
**Founder & CEO**

Entrepreneur, CEO and Principal Investor of Cock Fights. In the past, he was the founder of delivery services. Now he is a crypto-investor, an enthusiast and a rational dreamer. He handles all issues related to financing, management and development.

**Igor T.**  
**Co-investor,  
Entrepreneur.**

Representing and protecting the interests of the project, engaged in strategic planning, and networking development.

**Stanley P.**  
**Co-founder & CMO**

Marketer, copywriter and Content Lead on the Cock Fights team. Stanley is engaged in writing image texts for the project, broadcasting ideas, plans and releases. Past copywriter for Rovertask, Flowmapp and Air Cars. He turns Twitter Cock Fights into a GameFi FAQ archive.

**Sofia I.**  
**Chief Editor**

Editor, interpreter and persona connecting audiences with literate translations and adaptations into English. Sofia is engaged in direct editing of all Cock Fights texts into understandable and competent English. She is also responsible for moderating feedback and monitoring spam in all project accounts.

**Andrey R.**  
**Art Director**

Artist and designer on the Cock Fights team. Andrey is engaged in the creation of unique characters, draws graphics and art for presentations and social media of the project. He is a premier visualizer with over 9 years experience in the industry.

**Alex A.**  
**Tokenomics  
of project**

Developer of innovative financial products and startups. Alex has a higher education in finance and practical experience in various economic spheres. He solves the most complex management problems and represents the Bforse.ru website.
